MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 1: Introduction and Standards Letter

Members of the 19th Security Forces Squadron,

Hopefully by now I have spoken to you all, unfortunately I'm sure I have missed some of you. I want to more formally introduce myself and set the standard for formal communication within the 19 SFS. My attached bio will go over the pertinent elements of my career, but like all of you I am much more than that. At the appropriate times I look forward to discussing both work and personal topics as we get to know each other. I intend to use this format for official communication and policy changes during my tenure with the 19 SFS and encourage any questions or feedback through your chain of command.

The following are "Red Lines," or non-negotiable standards, that I want to relay to you. 1) The safe and responsible use of alcohol. Underage drinking, alcohol related incidents, and driving under the influence (DUI) are unacceptable, if you can not enjoy alcohol responsibly, then do not drink. 2) Illegal substance abuse; regardless of the legality of substances in a specific location, you are responsible for knowing what you consume. 3) Sexual harassment, sexual assault, and discrimination. We are a team, and if any member feels unsafe or unwelcome, we are not effective. 4) Dereliction of duty and conduct unbecoming of your rank. Regardless of your thoughts on the Security Forces career field, you are either a Law Enforcement professional, or support a critical Law Enforcement mission, and will act (and be held accountable) accordingly. You know the core values and the standards, aim to exceed them. I encourage you to trust your supervisory chain to solve problems and provide you information, however, I will always have an open-door policy for any of the issues listed above, or if your chain fails to appropriately support you.

Finally, I'd like to summarize my Command Philosophy to shed light on myself and my tenure at the 19 SFS. The Security Forces Mission is incredible. You are the premier ground force that enables the safe and reliable generation of airpower. We are responsible for DEFENDING airpower, Airmen, and civilians. To achieve that, we must TRAIN, PLAN, ADAPT, and SUPPORT, in not only our professional lives, but in our personal lives. We are the 19 AW's security and ground combat experts, be credible and confident in your duties. If you always act in the best interest of others and/or the mission, I promise we will be successful. I am truly excited to lead the 19 SFS, and to work with such an incredible team of military and civilian Defenders. I look forward to supporting you, executing the mission, and overcoming the challenges of the next few years with all of you.

Sincerely

ROBERT C. IPPOLITO, Maj, USAF
Commander, 19th Security Forces Squadron

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 2: 19 SFS Local Leave Policy

1. This memorandum outlines the 19th Security Forces Local Leave Policy, standardizing the requirements across the unit, and rescinds all previous memoranda of the same subject.
2. Effective immediately, authorized leave within the local area and outside the local area will be approved IAW DAFI 36-3003. The "local area," for purpose of leave and pass for 19 SFS is defined as, not to exceed 700-miles driving distance from the member's local residence.
3. The local area has been defined as 700-miles as it generally equates to 10-hours of driving time. This amount of time is manageable in a single day of driving. Defenders are required to work 12-hour shifts, and therefore, can drive 10-hours in a single day. Vehicle operators are reminded to take breaks (about 30-min every 2-hours) and keep total travel time less than 12-hours. Flights within the 700-mile radius are authorized, as members can drive back without significant financial hardship in emergency circumstances. Any flight outside the 700-mile radius, regardless of duration, requires a member to be on leave status. This policy recognizes the hard work and responsible decisions the 19 SFS Defenders make every day. I trust you to make smart and responsible decisions at work, while traveling is no different.
4. My point of contact for this policy is the 19 SFS/CSS, DSN 731-6644 or by email at 19SFS.CSS.CSS@us.af.mil.

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 3: 19 SFS Strategy

On 18 June 2024, the TSgts, MSgts, Civilians, and Command Team of the 19 SFS met to discuss the strategic direction of the Squadron. The unit is in an incredible place. Your dedication to each other and the job is what has made us successful so far. With the Squadron's leaders help, I want to provide what will hopefully be unifying purpose, ensuring we are all heading in the right and same direction.

Commander's intent, unifying purpose, and mission command are terms that are used increasingly to define dislocated operations. However, as Defenders, we execute these core competencies every day. This strategy (vision, mission and intent, lines of effort) aims to tie our militarism and tactical prowess, with the care and discipline needed to be an effective team. A unit's strategic direction is only as good as a Commander's ability to embody it; therefore, I empower you to hold each other, as well as myself, accountable to pursuing this vision, mission, and lines of effort. Our strategy is:

Vision:

Achieve Dominant, Agile, Professional, Trained Defenders to Win Every Engagement (ADAPT to Win)

Mission and Intent:

Project, Optimize, Shield, and Train Airmen in order to Defend the 'Rock' (POST iot Defend)

Lines of Effort and Motto:

Knowledge, Innovation, Leadership, and Lethality (KILL!)

The Squadron strategy should help guide your decision making and our efforts over at least the next 2-years. If you cannot find yourself in an element of this strategy or apply part of it to every situation, please review this memorandum and look internally. We believe there is an element of this strategy evident in everything we do. They also make some pretty cool acronyms. I am excited to fight in pursuit of this strategy with you all and trust you to use this intent and strategic direction to inform your decisions. You are the ground combat and law enforcement experts in Garrison and deployed, continue to pursue that; I trust you.

ROBERT C. IPPOLITO, Maj, USAF
Commander, 19th Security Forces Squadron

BLACK KNIGHTS...MOVE OUT!

The 19th Security Forces Squadron Vision Statement

Achieve Dominant, Agile, Professional, Trained Defenders to Win Every Engagement

(A.D.A.P.T to Win)

A vision is a guide to strategic action. It is an unachievable goal constantly in the distance. It is a handrail to keep us all on the same track, in the same direction, and at the same speed; we should aim to be in a better position and farther down the road to success. Our vision, shortened to 'ADAPT to Win' was deliberately developed to incorporate elements from the 19 AW and 19 MSG mission and vision statements, and the 19 SFS's previous mission statement. The ability to adapt is crucial to success in Great Power Competition (GPC). However, that adaptation must be based in knowledge, experience, and expertise. We change to meet an evolving threat, incorporate new technology, and become better versions of ourselves. The elements of the 19 SFS Vision are:

Achieve: We aim to achieve more dominant; more agile; more professional; and better trained defenders. 'Achieve' implies that the task is always ahead of us. We should never be content with our standing.

Dominant: As Defenders, we dominate terrain, situations, and programs. We are the experts in ground combat within the Air Force, and the only defensive combat experts in the DoD. You're taught to gain the tactical advantage in your responses. This domination of an opponent or problem should be applied universally in everything you do. Dominate your battle space, programs, problems, and AOR.

Agile: We must be agile in our tactical employment. Although we should aim to be proactive in our efforts, we are by our very nature, reactive to the actions of the enemy forces. Our ability to observe, orient, decide and act (OODA Loop), faster than our enemy will be the decisive factor in our success. This includes with or without technological systems. We operate in small teams, with huge responsibilities, leaders at every level need to understand agility and the ability to react to changing circumstances.

Professional: We are a professional force, requiring consistent attention to detail and effort. Our ability to deter threats is critical to the continued defense of our installations. We are the first thing people see at this installation, we set the tone for the base and are the Wing Commander's representatives to the community. Professionalism goes beyond that though. Your outward appearance tells a story, your demeanor when responding to incidents sets the tone, your knowledge, and the ability to relay that knowledge, establishes your credibility.

Trained: To be dominant, agile, and professional takes work. The most challenging obstacle in your career should be a training task, don't let your challenges come when the results matter most. If you don't train to the task, condition, and standards required, you will not perform when it counts. Training builds teamwork, confidence, and competency that is critical in our mission, every day.

Win Every Engagement: The previous vision of the 19 SFS, and our current strategic unifying purpose. Winning means beating the scenario; it does not always require a loser. Winning every engagement requires you to first establish the criteria for winning, then meeting (or exceeding them), against every 'engagement.' An engagement can be a deadline, opponent, ticket, pass checked, or any number of taskers required of you; define the criteria to succeed and surpass it. 'Win' is the 19 AW/CC's vision for this installation, it is critical that we win every time, everywhere. We are Defenders and must ADAPT with the purpose of winning; we can not lose.

The 19th Security Forces Squadron Mission and Intent

Project, Optimize, Shield, and Train Airmen in order to Defend the 'Rock'

(POST iot Defend)

A mission is a tactical order. It is the task we have been entrusted to accomplish. The British Army defines it as, "a clear, concise statement of the task of the command and its purpose." The US Army often refers to it as the "who, what, where, when, and why." We have been tasked to POST Airmen, every day and everywhere, in order to Defend the 'Rock'. Defending the 'Rock' is our why. It is the tactical level unifying purpose, and my Commander's Intent. As Defenders, we 'post' everyday for shift. Whether you're on Flight or not, coming to work each day is a conscious effort and is something to be proud of. 'Post' is a way to honor that commitment and remind us that regardless of where we are each day, when our duty starts, we are trusted to be Defenders.

Project: As the Defenders of Herk Nation, our mission does not end at the fence line. We are responsible for the security of personnel and resources wherever they are. Readiness and preparedness are critical elements of projecting. Be ready to execute our mission across the globe, mentally and physically, always; we need you.

Optimize: Optimizing is key to achieving our vision (ADAPT). We should never be happy with the status quo. Continue to grow, progress, and improve your lives (and fighting positions). Optimizing is committing to change in a positive direction based on experience and knowledge.

Shield: A shield is a defensive weapon but can cause just as much damage as a sword at close range. We are the shield of Team Little Rock (TLR). We wait patiently for our time, in a protective stance, ready to block and strike at a moment's notice.

Train: We train to succeed. We train not only ourselves, but our fellow Airmen, families, and partners. You are the experts in security. We must continue to reach for knowledge and perfecting your skills. Being a Defender takes consistency and effort; it is a perishable skill that requires training.

Airmen: We are the Air Force's premier ground infantry force. There is no other career field in the United States Air Force capable of coordinated ground operations in the face of the enemy. However, anyone can perform security, we coordinate and hone them. The SF Commander is also referred to as the Defense Force Commander (DFC), when the base is under attack, they answer to no one. The DFC, however synonymous with the SF Commander it may be, is actually held by the ranking Defender. In their absence, the ranking 3P or 31P is responsible for training and coordinating all Airmen in the defense of the installation; be prepared for that responsibility.

Defend the 'Rock': As our tactical unifying purpose and my Commander's Intent, Defend the 'Rock' has two meanings. The first is to defend Little Rock Air Force Base, often referred to as 'The Rock.' This is our daily task; you must know the policies and requirements that entails. You should be acting in the defense of the base, not impeding its ability to achieve the greater mission. The second action is to defend 'the rock.' Our 'rock' is an abstract term for the asset behind you. You need to place yourself in a position, mentally and physically, to Defend the 'Rock' at all times. As the Commander's Intent, if you always act in defense of the metaphorical 'rock' you will never be wrong. Those not actively 'defending a rock,' must support those on the line, and never forget the unifying purpose for our existence; to Defend the 'Rock.'

The 19th Security Forces Squadron Lines of Effort (and Motto)

Knowledge, Innovation, Leadership, and Lethality

(KILL!)

Our lines of effort fall in-line with our Vision and Mission. They are buckets of emphasis that we use to focus our efforts into action. At any given time, the priority of these lines will change, but we cannot take emphasis off any of them. It will always be someone's responsibility to continue to further one of these elements for the Squadron. Conveniently, these LOEs spell "KILL." An abrupt reminder that, while a portion of our job is to serve the community as law enforcement officers, we are capable and competent killers first and foremost. Our new motto, "KILL!" honors these lines of effort.

Knowledge: The first Line of Effort for the unit is Knowledge. It is not a coincidence that it comes first, as it is critical to every element of our vision, mission, and other lines of effort. You must know your job and the responsibilities it brings. The chess piece that adorns our patch is an apt analogy for the nuanced role we play in defense of the installation. You must further your knowledge of tactics, resilience and leadership, information for your families, friends, and loved ones, and pursuit of further education in fields that interest you. While you are a killer, you must execute it dutifully, which requires knowledge of your target, weapon system, and yourself. We will establish quantitative goals to assess, track, and meet our knowledge goals as a Squadron.

Innovation: Keeping in line with Group, Wing, and Air Force priorities, the second Line of Effort is Innovation. We need to be innovative Defenders, leaders, and Airmen. We need to innovate (and optimize) our missions to continually improve and to meet the enemy capabilities. We will establish quantitative goals to assess, track, and meet our innovation goals as a Squadron.

Leadership: You are all leaders. Whether it is a flight, element, or a post, you are entrusted and empowered to lead. Leadership is an ever-evolving target that takes continuous practice and knowledge to achieve. While leadership is a capability the Air Force prides themselves on teaching, Defender Leadership is a unique entity that requires specific emphasis. We will establish quantitative goals to assess, track, and meet our leadership goals as a Squadron.

Lethality: A critical element of KILL, Lethality is last, but definitely not least. We must continue to be more lethal. Training, readiness, and agility are all elements that need continuous upkeep to maintain. We are a lethal force, the only kinetic-action element at the Wing Commander's disposal. C-130s, while impressive, are cargo aircraft and not capable of fighting many enemies. We are the unit entrusted to directly engage and defeat the enemy. We will establish quantitative goals to assess, track, and meet our lethality goals as a Squadron.

KILL! The newest Motto of the 19 SFS, which will be used to signal Defenders are present. It is a reminder to us of our priorities of effort, and to those who hear it what our real purpose is. The call and response is:

Leader: "**Defenders!**"

All Defenders: "**KILL!**" (yelled in unison, loud, short, and aggressive)

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 4: Physical Training Policy

1. This memorandum outlines the 19 SFS Physical Training (PT) Policy and expectations for all personnel.
2. All staff personnel from the Command Staff, S1, S2, S3, S4, and S5 (not shift workers) are expected to participate in Physical Training with the Training Flight members once per week. Staff personnel will attend Squadron PT on Tuesday mornings at 0700, along with the members in the "30-day Training Program" at the Vehicle Bay/Warehouse (Bldg. 481). Alibies will be reported to and tracked by Section Leads.
3. The weekly workouts will vary depending on the 30-day Training Schedule, base events, and weather; this will also affect the uniform/time/location required. The 3x uniform options are:
 - a. Weather and professionally appropriate civilian PT attire.
 - b. The Air Force Physical Training Uniform (PTUs).
 - c. OCPs with boots and duty gear (body armor & backpack/ruck).

If different from "civilian PT attire, 0700, at the warehouse," the required attire, time, location, and workout overview will be published NLT the Thursday prior (i.e. Staff Meeting).

4. Physical training, and passing your required fitness/measurement tests, is and will remain to be a personal responsibility; the intent of this weekly session is not to pass PT tests. While these sessions will help overall fitness, the intent is to: 1) build team camaraderie; 2) grow our physical/tactical proficiency; and 3) lead from the front. To achieve that, workouts must be difficult, mission focused, and consistent. Expect these sessions to progress to focus more on team building and Security Forces training, rather than traditional PT sessions.
5. Report any issues or recommendations for the PT Program to S4T. Any questions or concerns related to this policy can be directed to Maj Ippolito, at robert.ippolito.1@us.af.mil.

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 5: Uniform Policy and Standards (Updated 07 Feb 25)

1. This memorandum outlines 19 SFS specific uniform policies and standards.
2. **Headgear** - IAW DAFI 36-2903, *Dress and Personal Appearance of Department of the Air Force Personnel*, paragraph 10.3, any Defender posted at Installation Access Control Points (IACPs), as a Law Enforcement Patrol, or serving in a staff function will wear the authorized Beret. As all patrols at Little Rock AFB are dual-purpose (Security/LE), all 19 SFS Defenders who hold a 3P/31P AFSC will wear the authorized Beret while in uniform.
3. IAW DAFI 36-2903, paragraph 10.3.1, the Commander may authorize deviations to the above order. While deviations are subject to change, the standing deviations from the above policy are:
 - a. When the local temperature outside is above 90 degrees Fahrenheit, wear of the Tactical OCP Cap (Baseball Cap) or OCP Patrol Cap is authorized for Defenders posted at IACPs only.

(1) Local temperature is based on the *actual* (not 'real feel') temperature for Jacksonville, AR. The local temperature is determined by the on-duty Flight Chief (or Flight Sergeant) using either military or commercially available means (i.e. the weather app on your phone). All Defenders must report for duty with a serviceable Beret.
 - b. When the local temperature outside is below 45 degrees Fahrenheit, wear of the coyote or black watch cap (beanie) is authorized for all Defenders.
 - c. When participating in Squadron-level Training, headgear is at the direction of S4T Instructors and should be based on scenario, temperature, and training objectives. Tactical/Patrol caps may be worn during direct transit to/from training areas, but not to/from stops or appointments.
 - d. When not required to wear headgear (i.e. training areas, flightline, no hat/no salute) Defenders may wear the headgear of their choice. NOTE: Boonie Hats are not authorized for wear unless specifically authorized in field conditions by the S4 Superintendent or higher authority. CATM is authorized to wear the red baseball cap while in/around SFS facilities only.
4. Defenders are one of the few career fields in the Air Force authorized to wear a beret. It is a privilege and demonstrates professionalism, dedication, and pride in our duties. However,

BLACK KNIGHTS...MOVE OUT!

climatic conditions make wearing the wool-blend beret in extreme weather impractical, and it can lead to increased fatigue, lack of focus on a Defender's primary duties, and increased risk of weather-related injuries. All Defenders should be proud to wear the beret while taking reasonable precautions to ensure we are always alert, professional, and ready to execute our primary mission. Preparedness is a whole-body task, and includes elements like mental readiness, hydration, physical fitness, and healthy eating habits. The professionalism and pride from wearing the beret is only one part of this whole-body approach.

5. **Electronic Devices** - Posted Defenders who are either on-duty and/or armed will not wear/use distracting, personally procured electronic devices. This includes headphones, 'Air Pods', virtual/augmented reality glasses or devices, blue tooth calling devices, or any similar product. Cell phones are authorized for personal use on post; however, personal use of cell phones will be kept out of view of the public and will not distract from a Defender's primary duties. Cell phones are an authorized means for official communication, if primary and alternate means are not available. Unit issued headsets that connect to the issued radios are authorized for use. Situational awareness is critical for posted Defenders and must not be compromised while on duty.

6. **Body Armor** - Defender's gear is to be clean, serviceable, sized appropriately, and prepared for shift. The Modular Scalable Vest (MSV) issued from LRS, in the appropriate configuration for your assigned duties is mandatory for wear. Flight Chiefs/Sergeants are responsible for validating equipment functionality during Open Ranks Inspections (ORIs) conducted at Guardmount and at higher levels. Personally procured pouches are authorized, however, they must meet reliability and color standards similar-to or better-than the issued equipment.

a. Defenders are not authorized to wear moral patches on their uniform. Defenders are only authorized to wear those patches authorized for wear on the uniform (flag, MAJCOM patch, Sqn patch, rank, name, SF badge, and 'US Air Force'), subdued blood type, and the issued Sqn name placard on their duty gear. Last name and rank will always be visible while on duty (displayed on the front of body armor). **No** state flags, color patches, foreign country flags, personally designed name placards (after the Sqn approved versions are issued), "SF" duty identifiers, or any other patches are authorized for wear on uniforms or duty gear.

7. Any questions or concerns related to this policy can be directed to Maj Ippolito, at robert.ippolito.1@us.af.mil, via the chain-of-command.

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memo 6 - Government Owned Vehicle (GOV) Use on Perimeter Road

1. This memorandum outlines the use of 19 SFS GOVs on Perimeter Road, which is defined as the dirt/unimproved track surrounding the perimeter of the installation. This policy is established in an effort to mitigate vehicle damage, safeguard vehicle operators from abuse claims, and preserve vehicles for continued operations.
2. Vehicles designed for use on improved roadways (i.e. sedans, pick-up trucks, and vans) will not be used for perimeter checks on Perimeter Road unless directly authorized by the VCO, Operations Staff (Ops Superintendent minimum) or the Command Team (CC, SEL). This includes pick-up trucks with four-wheel drive.
 - a. The only authorized vehicles to conduct perimeter patrols during normal circumstances are the Polaris side-by-sides, and the Polaris MRZR if certified to operate it.
 - b. If no authorized vehicles are available, Flight Chiefs will contact the VCO and Operations Staff for authorization/guidance prior to conducting a perimeter check in a GOV, under non-emergency circumstances.
3. In the event of an emergency, or when responding to a credible threat/incident along the perimeter, the on-duty Flight Chief may authorize the use of any GOV along Perimeter Road. Fault for any damage to an unauthorized vehicle operating on the Perimeter Road under such circumstances will be determined via an investigation. If appropriate, the operator will be held accountable for all damage/repair costs. Flight Chiefs are ultimately responsible for and entrusted to make scenario-based decisions while on duty; this responsibility shall not be hindered by this policy.
4. Contact the Vehicle Control Officer (VCO) or S4V at DSN: 731-7075 with any questions or concerns regarding this memorandum.

MEMORANDUM FOR ALL AMC PERSONNEL

FROM: AMC/CC
510 POW/MIA Dr
Scott AFB IL 62225-5011

SUBJECT: Air Mobility Command Uniform Policy Changes

References: (a) CSAF Memorandum, Update to DAFI 36-2903, dated 24 January 2025
(b) CSAF Video – “Air Force Standards – Tabs”, 27 Jan 25;
<https://www.dvidshub.net>
(c) DAFI36-2903_DAFGM2025-01, Department of the Air Force Guidance Memorandum to DAFI 36-2903, *Dress and Personal Appearance of Department of the Air Force Personnel*, 1 February 2025

1. The CSAF’s recent guidance and direction on uniform standards seeks to reduce complexity and increase understanding and compliance with standards. This guidance clarifies our value as Airmen is as an integral part of a warfighting team and emphasizes that we value the team over the individual and mission over function. In addition to the CSAF’s guidance on the wear of Duty Identifier Tabs, I hereby direct all AMC Airmen will discontinue wear of the following uniform items:

- a. Morale patches, pen tabs, nametags and other unofficial heritage add-on patches and accoutrements
- b. Morale shirts worn with the utility, flight duty, or physical training uniforms

2. AMC/A1 will issue a Guidance Memorandum to the current AMC Supplement to DAFI 36-2903 to codify these changes pending a full revision of the Supplement.

3. Please direct any questions regarding this memorandum to our AMC/A1K staff at DSN 229-8035 or 229-8034.

30 March 2025

MEMORANDUM FOR BLACK KNIGHTS COMMANDERS

FROM: 19 AW/CC

SUBJECT: **UPDATED** 2025 Schedule for Standards and Readiness Reviews

1. As we chart this season of change together, we cannot lose sight of the basics and what unites us as a fighting force: our uniformity and adherence to standards. We are ONE team, with ONE standard, and most importantly, we have ONE relentless focus on bringing "Tacair Anywhere." These quarterly Standards Readiness Reviews (SRR) offer an opportunity for unit leaders to engage with their Airmen, ensure uniformity, and emphasize our Warrior Ethos Mindset.

2. **All SRRs will be conducted in clean uniforms and shoes/coyote boots.** Should a member miss the SRR due to TDY, leave, or other excused absence, the unit commander will ensure execution and documentation of the Airman's inspection within five duty days after returning to home station.

3. Unit commanders will prepare a plan for their SRRs and present to the 19 AW/CC via the wing exec email box (19awcce@us.af.mil) no later than seven calendar days prior to the event.

4. 2025 Standards and Readiness Review Schedule

a. Quarter 1 (OCP Pattern, including OCPs or OCP Flight Suits, NOT Green Flight Suits)

(1) 19 AW: 7 March / 19 MDG: 6 March

(2) 19 AW Mandatory Wing-Wide Retreat Ceremony: 7 March @ 1600 hours (OCP Pattern Only)

b. Quarter 2 (Service Dress)

(1) 19 AW: 13 June / 19 MDG: 12 June

(2) Herk Nation Mandatory Base-Wide Retreat Ceremony: 22 May @ 1500 hours (OCPs/any Flight Suit)

c. Quarter 3 (Short Sleeve Blues Uniforms)

(1) 19 AW: 15 August / 19 MDG: 14 August

d. Quarter 4 (OCPs only; no OCP Flight Suits or Green Flight Suits authorized)

(1) 19 AW: 21 November / 19 MDG: 13 November

5. If you have any questions, please contact my executive team at 19awcce@us.af.mil or 501-987-6289.

DENNY R. DAVIES, Colonel, USAF
Commander

MEMORANDUM FOR 19 SFS

FROM: 19 SFS/CC

SUBJECT: Memorandum 10: Physical Training Policy – Updated Oct 25

1. This memorandum outlines the updated 19 SFS Physical Training (PT) Policy and expectations for all personnel.
2. **All personnel assigned to the 19 SFS, permanently or temporarily, will conduct physical training every duty day.** Personnel will follow the schedules listed below depending on their assigned sections.
3. Physical training, and passing your required fitness/measurement tests, is and will remain to be a personal responsibility; the intent of these sessions is not to pass PT tests. While these sessions will help overall fitness, the intent is to: 1) grow our physical/tactical proficiency; 2) lead from the front; and 3) build team cohesion. To achieve that, workouts must be difficult, mission focused, and consistent. Expect these sessions to progress to focus on Security Forces-specific drills, tactics, workouts, and team building challenges. PT outlines will be maintained by 19 SFS/S1 and distributed bi-weekly with workouts/activities for Staff and Flight.
4. **STAFF PERSONNEL:** Staff personnel are defined as those members assigned to S1, S2, S3, S4, and S5 that are not shift workers, including VCC, CATM, MWD Staff, and Training. Staff personnel generally work M-F, 0800-1700. Staff personnel will attend Staff-PT IAW the below schedule:

Monday		0800		Cardio
Tuesday		0800		Strength
Wednesday		0800		Personal PT/Recovery/Sports
Thursday		0800		Endurance
Friday		0630		Functional (Ruck/HIIT)

5. **FLIGHT PERSONNEL:** Flight personnel are those 19 SFS members whose primary duties are shift work within S3 (Alpha, Bravo, Charlie, Delta, MWD Flights). Flight personnel generally work a Panama 12 schedule. Flight-PT will be at the time/location directed by the Flight Chief. **Flight Chiefs should make every effort to facilitate personal/Flight-PT time during the duty day.** The Flight program is broken down to incorporate Flight-PT on the final day of each shift, and during the Flight Training Day. Flight personnel will attend Flight-PT IAW the below schedule:

Monday		Personal PT		Personal PT
Tuesday		Flight PT		Flight Chief Directed
Wednesday		-----		Off-Duty
Thursday		-----		Off-Duty
Friday		Personal PT		Personal PT
Saturday		Personal PT		Personal PT
Sunday		Flight PT		Flight Chief Directed
Monday		-----		Off-Duty
Tuesday		Flight PT		S3T Directed (Training Day)
Wednesday		Personal PT		Personal PT
Thursday		Flight PT		Flight Chief Directed
Friday		-----		Off-Duty
Saturday		-----		Off-Duty
Sunday		-----		Off-Duty

BLACK KNIGHTS...OUT FRONT!

6. Physical Training during Squadron PT sessions (Staff-/Flight-PT, not personal PT days) will normally be conducted in uniform. The default uniform will be the PT Uniform; however, some sessions may be conducted in OCPs or civilian attire. The default location is the 19 SFS Vehicle Bay; however, sessions may change locations to incorporate diverse equipment/terrain as needed.

7. 19 SFS members will attend scheduled PT sessions. Failure to attend PT sessions (including failure to provide proof of personal PT) will be handled IAW the Squadron's missed appointment policy. SFS members who require continued/long-term/unique accommodation (profile, appointments, etc.) will develop individual PT policies that will be signed by the member, supervisor, and 19 SFS/S1 and recorded in the member's PIF. SFS members are encouraged to develop personal physical training plans to supplement Staff-/Flight-PT. Profiles and PT limitations will be handled on a case-by-case basis. Security Forces is an extremely physical career field and requires dedicated rest/recovery/foundation days to ensure continued mission effectiveness. PT is a readiness tool to ensure we are prepared for the next fight; it should not contribute to a degradation in readiness. However, PT should be challenging and beneficial – there is a balance we aim to achieve with the 19 SFS PT Program.

8. 19 SFS/S1, 2d Lt Chavez will be the POC for the PT program. 19 SFS/S3T will help to build, lead, and vector the PT program to meet Squadron training goals. They are open to and encourage feedback on continuing to build an effective PT program.

ROBERT C. IPPOLITO, Maj, USAF
Commander, 19th Security Forces Squadron
